➤ Portfolio

I'm a Passionate Front-end Developer eager to contribute to team success through hard work, with excellent technical skills. Extremely motivated to constantly develop my skills and grow professionally.

🎓 Academic Proficiency

Frontend Developement
GreyAtom Edutech
03/2020 – 09/2020 | Online Certification

B.Tech in Electronics and Telecommunication
Dr. Babasaheb Technological University
07/2016 – 2020 | Lonere, India
  8.35-CGPA

High school
Jawahar Navodaya Vidyalaya
07/2014 – 05/2016 | Shegaon, India
  83.00%

🧠 Skills

TECHNICAL SKILLS
- **Proficient**: ReactJS, Redux, JavaScript, HTML5, CSS3, SASS, AJAX
- **Experienced**: Bootstrap, Styled Component, jQuery, Git, GitHub, Firebase

COURSEWORK
  Responsive Web Design, Deployment of web Apps, Testing and Optimization in React, Algorithms and Data Structure, Computer Network

🎸 Hobbies & Interests

- I love solving programming challenges and learning new concepts
- Exploring distant lands and Hiking with friends

📂 Projects

FoodStore (Food Delivery Application) 🔗
ReactJS | Redux | Axios | Router | Hooks | Firebase
This is the online food delivery web app which enables users to order food from their nearby restaurants. Users can filter as well as sort the food items accordingly. They can also use Cart to select multiple items. On the other hand, new users can choose the best of our available or recommended options.
  Source Code 🔗

Music (Spotify Music Clone) 🔗
ReactJS | Context API | Axios | Material UI | SASS
It's a Music Player. It allows playing songs and different audio tracks. It shows the collection of weekly top music playlist. Users can also search for any audio tracks, playlist, and artist. After logging in user can access many more exciting features.
  Source Code 🔗

Weather Application 🔗
ReactJS | Redux | Axios | Router | Bootstrap | SASS
It's a Weather web app that allows searching for the weather of any city around the world. On a valid search, current weather conditions are displayed. Users can get more information such as the chance of rain, humidity, wind, visibility, sunrise and sunset times, and more. Users can also add cities to "MyCities".
  Source Code 🔗
